

At Highfield Primary School

Science is good when...

- The children ask lots of questions and are keen to find out more.
- We make scientific links across the curriculum.
- We carry out practical investigations which the children lead.
- We use good resources and choose which ones we need for investigations.
- Children use good scientific vocabulary and understand the meaning of it.
- It is engaging and exciting and the children are motivated to learn.
- We go outdoors to enhance our learning.
- We work as a team and take on different roles in group work.
- Teachers have good subject knowledge.
- We record our work in a variety of ways.
- We go on regular visits and welcome visitors into school, as well as being involved in our local community.
